

# WE BUILD PRODUCTS THAT EXTRACT OIL AND GAS

Throughout the world's oil and gas producing regions, operators and service companies alike rely on Hunting's vast array of Well Construction, Well Completion and Well Intervention products and services to satisfy critical stages of the exploration and production process.

# One-Stop Services for a Global Industry

Hunting Manufacturing and Machining Services provides a wide range of standard and customized solutions that help you safely and productively minimize downhole risk and solve ever more complex problems.

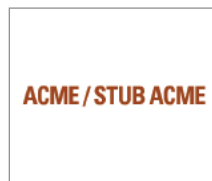

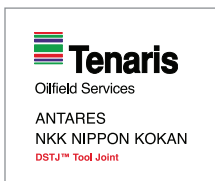

Guided by our belief in *Total Customer Satisfaction*, Hunting works to ensure that the performance you expect is built into every product and service provided.

We are the single resource you can confidently go to for your product or service request.

## Licensed Threads

Hunting's worldwide network of proprietary and premium-licensed threading facilities can machine a full range of API and premium-licensed threads onto manufactured and free-issue components.

The facilities can thread full length and accessory components from .750-in. to 20-in. diameters, or provide premium threads on OEM equipment.

## WHY HUNTING IS RIGHT FOR YOU

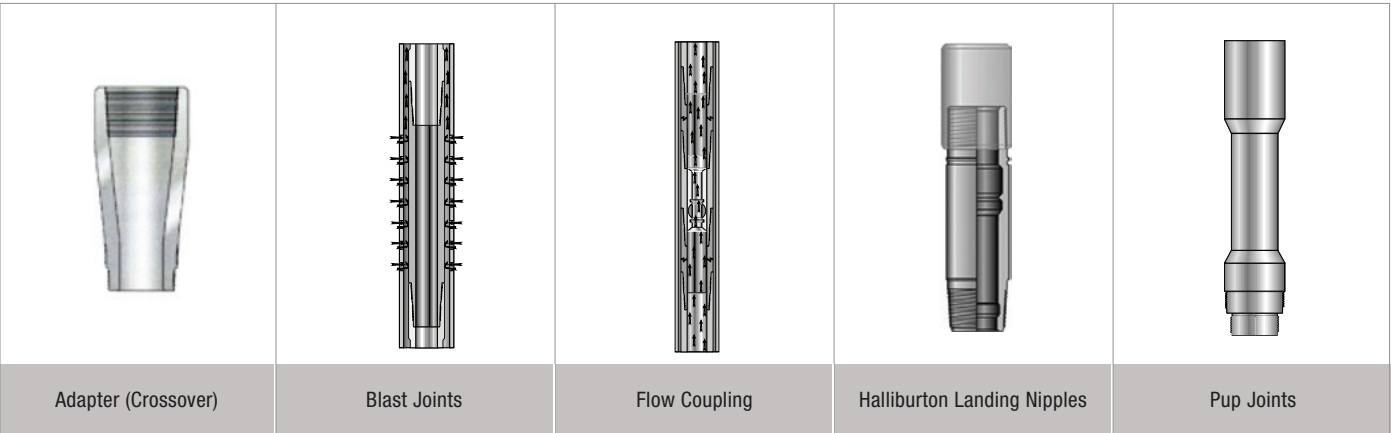

- A firmly entrenched “can do” culture and strong “sense of urgency”
- Highly efficient, precision machining
- 5 Axis CNC machining technology
- Industry leading quality management system
- 24:7 responsiveness
- Global network of Hunting owned and licensed machining facilities, and supply infrastructure
- Full spectrum of completion accessories, API and premium connection threading, well intervention tools – slickline, wireline or coiled tubing – as well as print part manufacturing
- Reputation for “on-time delivery” and quality products
- Extensive material support network

# Fully Compliant Products, Standard-Setting Services

Hunting has provided excellence in energy services for more than 100 years. Keys to our success include our versatility, in-depth manufacturing capabilities, and responsiveness to our customers’ product needs.

With a manufacturing focus on completion accessories, premium threading, OEM well intervention tools and print part manufacturing, Hunting offers an unsurpassed product and service range to operator and OEM alike.

# Well Intervention Equipment

Hunting's manufacturing portfolio also includes equipment for downhole intervention in producing wells for logging or other well services. Our integrated solutions include pressure control equipment, a comprehensive range of slickline and e-line tools, and mechanical plant. Many of Hunting's products are manufactured from proprietary designs under license from major oilfield service companies.

## Pressure Control Equipment

- Wireline valves
- In-situ pressure test subs
- Lubricators
- Grease injection control heads
- Stuffing boxes

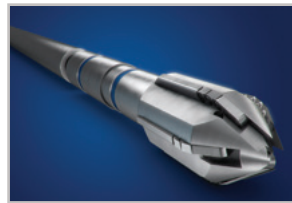

## Mechanical Plant

- Control panels
- Pressure testing equipment
- Shipping skids
- Containerized workshops

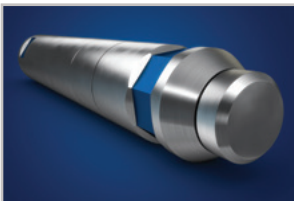

## Slickline Tools

- Rope sockets
- Stems
- Jars
- Running and pulling tools
- VariBall™ roller systems
- Halliburton Otis® certified
- Schlumberger Camco\*/Merla\*/Flopetrol\* certified

## Thru-tubing Technology

- Coiled tubing connectors
- Motorhead assemblies
- Check valves
- Disconnects
- Circulating subs
- Joints and stems
- Crossovers
- Centralizers
- Nozzles
- Motors
- Fishing tools
- Pipe cutters
- Halliburton-certified CT tools

## E-line Tools

- Electric line rope sockets
- Swivels
- Crossover joints
- VariBall™ roller systems
- Halliburton Otis® certified
- Schlumberger Camco\*/Merla\*/Flopetrol\* certified

Hunting's Manufactured Products Are Built to Meet Your Costs and Operational Specs

## HEALTH, SAFETY AND ENVIRONMENTAL POLICY AND CERTIFICATIONS

**Hunting PLC is an international energy services provider to the world's leading oil and gas, and oilfield service companies. Its high standard of excellence is in part due to its unwavering adherence to its health, safety and environmental (HSE) policy and its full compliance with industry standards.**
