

TEC-LOCK™ FJ

Connection Technology | Semi Premium

Features

- Available in casing and tubing sizes
- Flush OD for optimum clearance
- Flush ID bore
- Internal and external torque shoulders for increased torsional performance
- Tubing/casing sizes: 2.875 in. to 7.625 in.

Benefits

- High tensile and compressive performance
- Economical flush joint connection
- Maximum clearance for slim hole applications
- Low interference thread form
- Combined load tested with gas and water for sealability

Designed and tested for liner applications in accordance with API RP 5C5:2017.

TEC-LOCK FJ's sealing capacity was evaluated with API 5A3 compliant thread compound under gas and water pressure to simulate load conditions in unconventional wells.
