

Riser Lock

Pressure Control Equipment

Features

- Adapts to PCE without removing connections
- Inexpensive, easy to install and adjust

Benefits

- Prevents PCE quick union collars from loosening
- Economical compared to more sophisticated methods

Hunting's Riser Lock clamps are designed to adapt above the quick union collar of lubricator joint or similar piece of pressure control equipment (PCE) quickly and easily.

Easy to install without requiring removal of the connection of the PCE part and can install on integral lubricator when connections cannot be removed.

Riser Lock
